Sir:

I want to register my public comment regarding the proposed antitrust settlement. In my opinion it is time to settle this in any manner available. Although I think it is excessive, if Microsoft agrees to the terms please accept them.

I believe that the finding of Judge Jackson was one of the reasons for the current escalation of the recession. Besides- where would we be without Microsoft? Not nearly as advanced technology-wise as we are.

When I go to purchase software, I do not see a deficiency of other than Microsoft publishers.

Enough is enough. Too much valuable time and money have been wasted on the whole situation.

Thank you for taking the time to review these comments
